To whom it may concern:I am so upset to learn that there is a movement afoot to remove satellite radio from the airwaves. I live in an area where it is so difficult to receive radio. It is so limited. I love my satellite radio with a passion. I beg you, please protect this service. My God, this was America the last time I looked! This freedom is in danger too?? This is so innovative, so futuristic, so modern, so free.I hate regular radio-- if it is great, why don't they use more power?? I am so sick of weak little stations with these two-bit disc jockeys. Give me Art Bell and all those wonderful talk shows that I need to expand my mind. I have never felt such freedom of the mind since I got my radio. It is there loud and clear everytime I turn it on and I am very angry to think these whimps are trying to do away with it!Thank you--Marilyn A. Robinson
